About cottagecore and goblincore:

*Cottagecore and goblincore are
two distinct aesthetics that have
their own unique characteristics.
Cottagecore is a style that
revolves around the idea of living
a simple life in the countryside,
surrounded by nature and rustic
charm. It is often associated with
vintage clothing, floral patterns,
and traditional crafts such as
knitting and baking. On the other
hand, goblincore is a subculture
that is centered around the love
for nature and the outdoors, but
with a darker twist. It is
characterized by earthy tones,
mossy textures, and a fascination
with all things creepy and crawly.*
